

NIDHI MENON

menonnidhi96@gmail.com | (925) 394-6660 | Sunnyvale, CA | [GitHub](#) | [LinkedIn](#)

ML Engineer with 7+ years shipping production systems at scale, with deep expertise in recommender systems and GenAI/NLP (RAG, LLMs) and a track record of leading 0-to-1 builds from architecture through launch.

WORK & RESEARCH EXPERIENCE

The Jackson Laboratory (JAX), Remote

June 2026 - Present

ML Research Scientist, EndoRISE Program

- Applying ML expertise to women's health research using de-identified endometriosis patient data in collaboration with the Courtois Single Cell Biology Lab, focusing on patient stratification and correlation between surgical inflammation markers and immune comorbidities using clustering and association analysis on EPHeCT-standardized clinical data.

Career break - new parent

May 2025 - May 2026

Autodesk Inc, San Francisco, CA

Principal Machine Learning Engineer

May 2022 - Apr 2025

- Led 12-person cross-functional team through 0-to-1 architecture, development, and production launch of a personalized recommendation system for [Autodesk App Store](#); drove a 13% lift in app downloads across ~708K DAU at <100ms latency
 - Owned end-to-end system architecture for real-time ML inference at scale using Wide & Deep Networks with online feature serving; achieved <50ms p95 inference latency
 - Built feature store and data migration pipeline; reduced model training time by 40% and infrastructure costs by 25%
- Led 0-to-1 design and implementation of ML-powered customer support insights platform that proactively surfaced product issues and enabled natural-language querying across 10,000+ quarterly tickets
 - Piloted BERT-based topic modeling framework in partnership with [Autodesk Platform Services](#); surfaced 7 critical product issues whose targeted fixes reduced quarterly support volume by 10.7%
 - Extended system with a RAG architecture layered on vector embeddings, FAISS, and cross-encoder re-ranking for contextually relevant insights beyond predefined topics
 - Redesigned from a single-team POC into a modular platform with configurable data connectors; enabled 3 additional product teams to adopt automated ticket analysis with minimal engineering overhead
- Served as organizational Privacy Champion; led privacy impact assessments across ML initiatives, enforced data retention and ethics standards, and partnered with legal on open-source compliance

Senior Machine Learning Engineer

Jan 2019 - Apr 2022

- Engineered data compression framework that reduced API logs (~1.4GB/hr) by 99.8%, enabling anomaly detection for API abuse mitigation and data-driven decisions on monetization, subscriptions, and customer retention.
- Contributed ML expertise to two pro bono projects for [Autodesk Foundation](#); delivered predictive modeling and analytics for [Hope Street Group](#) and [Yuno Technologies](#)
- Championed Data-as-a-Service (DaaS) adoption across engineering teams; raised Blameless Postmortem completion from 20% to 75% and established self-service analytics for incident learning

Data Science Intern

May 2018 - Aug 2018

- Developed XGBoost models to forecast sprint velocity and burn rates for proactive agile coaching interventions (12.3% organization-wide burn rate improvement); built GitHub analytics tool for real-time open-source contribution tracking.

Georgia Institute of Technology, Atlanta, GA

Jan 2018 - Dec 2018

Graduate Student Researcher

- Facilitated interdisciplinary AI/neuroscience comparative study research; optimized deep CNN architectures (VGG-16/19, ResNet50, InceptionResNetV2) and designed hybrid image classification tasks for models and human responders

University of Mumbai, Mumbai, India

Jul 2016 - May 2017

Undergraduate Researcher

- Publication:** [Floor Layout Planning using Artificial Intelligence Technique](#)
Vol. 6, Issue 4, International Journal of Innovative Research in Science, Engineering and Technology (IJIRSET)

EDUCATION

Georgia Institute of Technology, Atlanta, GA

Aug 2017 - Dec 2018

Master of Science in Computer Science (Specialization: Machine Learning)

University of Mumbai, Mumbai, India

Aug 2013 - May 2017

Bachelor of Engineering in Computer Engineering

TECHNICAL SKILLS

Frameworks & Tools: PyTorch, TensorFlow, Flask, Git, Docker, PowerBI, Looker, AWS

Data & Infrastructure: SQL, DBT, Snowflake, DynamoDB, Redshift, Hadoop, Hive, Airflow
